Purpose
The Request for Qualifications (RFQ) is issued as contained in this document. The City of Fairhope, Alabama (City) is soliciting written proposals from professional civil engineering firms experienced in differential relays. The City of Fairhope reserves the right to select more than one Professional Engineering firm. Attached to the back of this RFP is a sample agreement that the successful proposers will be required to execute.

Scope of Work
The City is seeking an experienced Professional Engineer who will provide the professional services required to complete Project No. E001-11.

The overall objectives for the requested services are:

RELAY, SPECIFICATION, INSTALLATION, PROGRAMMING AND TESTING

Generally, the scope of work can be described as the removal of three mechanical relays and retrofit of three (3) electronic relays to provide differential relaying on three (3) substation power transformers. The successful consultant will be asked to develop and install all relay settings, and to physically perform the wiring work needed for installation. A turnkey solution is desired. City of Fairhope personnel will be available to perform any necessary switching to remove transformers from service. The City of Fairhope will be responsible for acquiring the needed relays and will have them available for the consultant prior to the beginning of any work being performed in the field.
The Scope of Work can be more narrowly defined as follows:

1. Specify the features, options or other particulars of three (3) SEL 751A Differential Relays for procurement by the City of Fairhope, to protect power transformers at City’s Delivery Point.
2. Develop a wiring schematic for removal of three (3) mechanical relays, and installation of three (3) electronic relays to provide for differential relay protection on power transformers.
3. Develop and upload electronic settings for three (3) SEL 751A relays to coordinate with upstream and downstream devices already in place. Upstream and downstream devices may be owned by Southern Company, or the City of Fairhope.
4. Remove three (3) mechanical relays from existing relay panels on three (3) separate power transformers.

6. Perform all necessary testing prior to commissioning of the three (3) SEL 751A relays.
7. Any existing single line diagrams owned by the City of Fairhope will be provided for use by the consultant.

Time Line

1. The City shall request from selected firms (minimum of three, if possible) for each project that they submit a technical approach or project understanding, scope of services, and other details the City will use to evaluate and select the firm the City determines to be most qualified for specific projects. Interviews or decisions may be required during evaluation of technical proposals.

2. A committee of six (6) consisting of the of the Mayor, City Administrator, General Superintendent, Purchasing Manager, Electric Superintendent, and one (1) member of City Council, will evaluate and rank the professionals the committee feels are most qualified to provide the required service(s).

3. The City shall then negotiate a contract with the firm ranked by the City as most qualified.

4. Should the City not be able to negotiate a contract with the firm ranked most qualified then the City shall terminate the negotiations and enter into negotiations with the next most qualified firm. This negotiation process may continue and be repeated until the City is able to successfully negotiate a contract.
5. This procedure may also be suspended when the City Council determines an emergency exists.

6. Qualifications of any sub-consultant(s) used to obtain qualification in the various areas are to be included in the firm's statement of qualifications.

7. Upon final RFQ submittal and review by the City of Fairhope, the Fairhope City Council will award the contract.
